

Vital-Cath™ Max

**Closed Suction Systems
with Multi-function Adapter**

Safe and Simple Access to Patient's Airway

Vital-Cath™ Max Closed Suction System features a compact dual-channel switching manifold. It provides multi-functional access for fiber-optic bronchoscopy, mucus sampling and other airway access procedures without disconnection from the closed suction system.

Bronchoscopy Suction Adapter

Vital-Cath™ Max system features an unique bronchoscopy/suction adapter that seals patient's airway from the access port while performing airway access procedure.

Replaceable Suction Catheter

Disconnecting of the ventilator circuit can lead to lung de-recruitment and hypoxemia, which increases risks of cross-contamination and is a potential source for VAP.

The unique adapter allows for the replacement of a catheter without opening the breathing circuit, keeping the patient on the ventilator at all times.

U.S. Patent No. 9,427,541.
Other Pat. Pending.

Vital-Cath™ Closed Suction Systems with Multi-function adapter

Product Code	Catheter Length	Remark	Outer Diameter	Packaging	ISO Colour
6151000A	595mm	Endotracheal	10FR / 3.33 mm	10ea/box	■
